

Forever™ Essential Oils - Peppermint

Forever™ Essential Oils Peppermint is made from plants that are grown and harvested by the same farm for over 85 years with naturally higher menthol content, providing the cooling effect that peppermint is known for. Forever Living provides nature's purest Peppermint Oil to invigorate and refresh.

The use of peppermint dates back to ancient Roman and Greek culture when peppermint was used as décor and an aromatic in addition to being a popular flavoring in sauces and foods.

To ensure quality, each Forever Essential Oil goes through several steps. A carefully selected team of experts with years of experience in growing, cultivating and producing essential oils evaluate each oil using smell, sight or organoleptic verification. An FC-MS lab analysis is performed to ensure that each batch of essential oils meets the quality and potency required by Forever.

Forever™ Essential Oils Peppermint – 100% Pure. 100% Fresh.
